64 k SRAM (8-kword  $\times$  8-bit)

# HITACHI

ADE-203-454B (Z) Rev. 2.0 Nov. 1997

#### Description

The Hitachi HM6264B is 64k-bit static RAM organized 8-kword  $\times$  8-bit. It realizes higher performance and low power consumption by 1.5  $\mu$ m CMOS process technology. The device, packaged in 450 mil SOP (foot print pitch width), 600 mil plastic DIP, 300 mil plastic DIP, is available for high density mounting.

#### Features

- High speed Fast access time: 85/100 ns (max)
- Low power Standby: 10 μW (typ) Operation: 15 mW (typ) (f = 1 MHz)
- Single 5 V supply
- Completely static memory No clock or timing strobe required
- Equal access and cycle times
- Common data input and output Three state output
- Directly TTL compatible All inputs and outputs
- Battery backup operation capability

# **Ordering Information**

| Туре No.                          | Access time     | Package                              |

Notes: 1. A write occurs during the overlap of a low  $\overline{CS1}$ , and high CS2, and a high  $\overline{WE}$ . A write begins at the latest transition among  $\overline{CS1}$  going low,CS2 going high and  $\overline{WE}$  going low. A write ends at the earliest transition among  $\overline{CS1}$  going high CS2 going low and  $\overline{WE}$  going high. Time  $t_{WP}$  is measured from the beginning of write to the end of write.

- 2.  $t_{CW}$  is measured from the later of  $\overline{CS1}$  going low or CS2 going high to the end of write.
- 3.  $t_{AS}$  is measured from the address valid to the beginning of write.
- t<sub>WR</sub> is measured from the earliest of CS1 or WE going high or CS2 going low to the end of write cycle.
- 5. During this period, I/O pins are in the output state, therefore the input signals of the opposite phase to the outputs must not be applied.
- In the write cycle with OE low fixed, t<sub>wP</sub> must satisfy the following equation to avoid a problem of data bus contention

 $t_{\text{WP}} \ge t_{\text{WHZ}} \text{ max} + t_{\text{DW}} \text{ min.}$ 

Write Timing Waveform (1) (OE Clock)

## Write Timing Waveform (2) ( $\overline{OE}$ Low Fixed) ( $\overline{OE}$ = V<sub>IL</sub>)

| Chip deselect to data retention time | t <sub>CDR</sub>  | 0                  |                        |                  | ns   | See retention waveform  |
| Operation recovery time              | t <sub>R</sub>    | t <sub>RC</sub> *3 |                        | _                | ns   | _   |
| Notes: 1. Reference data             | a at Ta = 25      | °C.                |                        |                  |      |   |

## **Low V**<sub>CC</sub> **Data Retention Characteristics** (Ta = 0 to $+70^{\circ}$ C)

2.  $10 \,\mu\text{A}$  max at Ta = 0 to +  $40^{\circ}\text{C}$ .

- 3.  $t_{RC}$  = read cycle time.
- 4. CS2 controls address buffer, WE buffer, CS1 buffer, OE buffer, and Din buffer. If CS2 controls data retention mode, Vin levels (address,  $\overline{WE}$ ,  $\overline{OE}$ ,  $\overline{CS1}$ , I/O) can be in the high impedance state. If  $\overline{CS1}$  controls data retention mode, CS2 must be  $CS2 \ge V_{cc} - 0.2$  V or 0 V  $\le CS2 \le 0.2$  V. The other input levels (address, WE, OE, I/O) can be in the high impedance state.

- 3. Hitachi will not be held responsible for any damage to the user that may result from accidents or any other reasons during operation of the user's unit according to this document.
- 4. Circuitry and other examples described herein are meant merely to indicate the characteristics and performance of Hitachi's semiconductor products. Hitachi assumes no responsibility for any intellectual property claims or other problems that may result from applications based on the examples described herein.
- 5. No license is granted by implication or otherwise under any patents or other rights of any third party or Hitachi, Ltd.
- 6. MEDICAL APPLICATIONS: Hitachi's products are not authorized for use in MEDICAL APPLICATIONS without the written consent of the appropriate officer of Hitachi's sales company. Such use includes, but is not limited to, use in life support systems. Buyers of Hitachi's products are requested to notify the relevant Hitachi sales offices when planning to use the products in MEDICAL APPLICATIONS.
